

BUILDING BRACKETS/ELEVATION ACCESSORIES

Original Elevators® brackets and elevation accessories give you the hardware you need to build the platform for your Shadow Hunter Blind.

- Made with 12-gauge high-strength powder-coated steel that has been laser cut and robotically welded
- Provides a wobble-free platform

“ This product made my blind stand so much easier to build. The product is strong, great design and well-made ”

Building Brackets

4X4 Compound Angle

(E1088) – SET OF 4

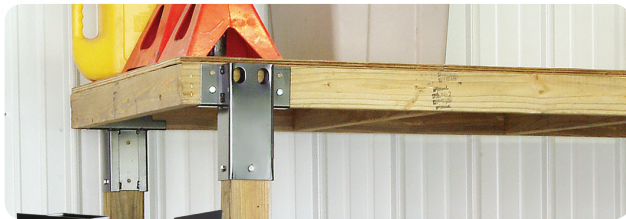

Most commonly used to raise hunting blinds and any other kind of platform that requires 4x4 legs for bearing heavier loads, and double pre-set angles for side-to-side stability.

4X4 Single Angle

(E1008) – SET OF 2

Great for outdoor projects that need additional support not provided with the Compound Angle Elevators. Most commonly used to build ladder stands up to 16 ft.

4X4 Straight Angle

(E1000) – SET OF 4

Perfect for any kind of platform that requires 4x4 legs for heavy loads and straight legs to save floor space.

Elevation Accessories

Blind Anchor System (SHBAS)

The high-strength steel design of the Blind Anchor System ensures your blind is securely anchored in three easy steps.

Blind Mobility Unit

(SHBMU)

A tubular steel design and rugged all-terrain tires, adjustable in width to accommodate blinds from 4 feet to 6 feet. The 2" hitch mount is removable, so no one but you can move your blind.

Adjustable Ladder/Platform Kit

(SH33LP)

Designed to bolt up to any Shadow Hunter blind or elevated platform made of dimensional lumber. The kit is adjustable from 5 to 10 feet and is constructed from rugged, powder coated steel.
